MRI of Clot in Cerebral Venous Thrombosis | Stroke

Vasculitis

Includes term: Microscopic polyangiitis. Inflammation of the blood vessels that causes changes in the blood vessel walls. When your blood vessel becomes weak, it might stretch and bulge (called an aneurysm). It might also burst open, causing bleeding. This can be life-threatening.

<
<https://drtrozzi.org>>

Vasculitis on inside of calves

Guillain-Barré Syndrome

A neurological disorder in which the body's immune system mistakenly attacks part of its peripheral nervous system—the network of nerves located outside of the brain and spinal cord. GBS can range from a very mild case with brief weakness to nearly devastating paralysis, leaving the person unable to breathe independently. Fortunately, most people eventually recover from even the most severe cases of GBS. After recovery, some people will continue to have some degree of weakness.

<https://drtrozzi.org>

Lymphadenopathy

Anaphylaxis

Includes term: Anaphylactoid. A severe, potentially life-threatening allergic reaction.

► **Total Papers: 30**

<
<https://drtrozzi.org>>

Young woman experiencing anaphylactic shock

Myopericarditis

A complication of acute pericarditis, is characterized by extension of pericardial inflammation to the myocardium, which manifests as an elevated troponin level. It is generally evaluated and treated as acute pericarditis.

► **Total Papers: 21**

<
<https://drtrozzi.org>>

Pericardium

Inflamed
pericardium

Acute Pericarditis (inflammation of the pericardium)

Allergic Reactions

Includes Term: Allergy. A condition in which the immune system reacts abnormally to a foreign substance.

► **Total Papers: 20**

<
<https://drtrozzi.org>>

Allergic reaction (hives) on arm

Bell's Palsy

Includes Terms: Facial Paralysis & Facial Palsy. An unexplained episode of facial muscle weakness or paralysis. It begins suddenly and worsens over 48 hours. This condition results from damage to the facial nerve (the 7th cranial nerve). Pain and discomfort usually occur on one side of the face or head.

► **Total Papers: 18**

<
<https://drtrozzi.org>>

Bell's Palsy on female face

Axillary Adenopathy

Includes term: Adenopathy. Also called armpit lump, axillary lymphadenopathy occurs when your underarm (axilla) lymph nodes grow larger in size. While this condition may be concerning, it's usually attributed to a benign cause. It may also be temporary.

[≤
https://drtrozzi.org>](https://drtrozzi.org)

Axillary adenopathy under right arm

Pericarditis

Swelling and irritation of the thin, saclike tissue surrounding your heart (pericardium). Pericarditis often causes sharp chest pain and sometimes other symptoms. The chest pain occurs when the irritated layers of the pericardium rub against each other.

► **Total Papers: 15**

 English (UK)

<
<https://drtrozzi.org>>

Acute Myelitis

Includes Term: Transverse Myelitis. An inflammation of the spinal cord which can disrupt the normal responses from the brain to the rest of the body, and from the rest of the body to the brain. Inflammation in the spinal cord, can cause the myelin and axon to be damaged resulting in symptoms such as paralysis and sensory loss. Myelitis is classified to several categories depending on the area or the cause of the lesion; however, any inflammatory attack on the spinal cord is often referred to as transverse myelitis.

► **Total Papers: 15**

<
<https://drtrozzi.org>>

Acute Myelitis

Perimyocarditis

An acute inflammation of the pericardium and the underlying myocardium resulting in myocellular damage. It is usually asymptomatic with complete resolution in most cases. It can however lead to fulminant cardiac failure resulting in death or requiring cardiac transplantation.

► **Total Papers: 10**

<
<https://drtrozzi.org>>

Intracerebral Haemorrhage

Includes Term: Stroke. Intracerebral hemorrhage (bleeding into the brain tissue) is the second most common cause of stroke (15-30% of strokes) and the most deadly. Blood vessels carry blood to and from the brain. Arteries or veins can rupture, either from abnormal pressure or abnormal development or trauma.

Urticaria (hives) allergic skin reaction

Vogt-Koyanagi-Harada syndrome

A rare disorder of unknown origin that affects many body systems, including as the eyes, ears, skin, and the covering of the brain and spinal cord (the meninges). The most noticeable symptom is a rapid loss of vision.

► **Total Papers: 2**

<https://drtrozzi.org>

Rapid loss in vision from Vogt-Koyanagi-Harada syndrome

Capillary Leak Syndrome

Includes Term: Systemic Capillary Extravasation Syndrome. A rare disorder by acute and severe recurrent attacks associated with a rapid fall in blood pressure as a result of fluid leaks from smaller vessels called capillaries. Attacks often last several days and require emergency care. They are sometimes life threatening. SCLS occurs most often in adults and the disease is very rare in children.

► Total Papers: 2

<https://drtrozzi.org>

Capillary leak syndrome results in dramatic swelling

Systemic Lupus Erythematosus

An autoimmune disease in which the immune system attacks its own tissues, causing widespread inflammation and tissue damage in the affected organs. It can affect the joints, skin, brain, lungs, kidneys, and blood vessels. Treatment can help, but this condition can't be cured.

► **Total Papers: 2**

<
<https://drtrozzi.org>>

Systemic Lupus Erythematosus

Petechiae

Includes: Petechial rash. Tiny purple, red, or brown spots on the skin. They usually appear on your arms, legs, stomach, and buttocks. You might also find them inside your mouth or on your eyelids. These pinpoint spots can be a sign of many different conditions – some minor, others serious. They can also appear as a reaction to certain medications. Though petechiae look like a rash, they're actually caused by bleeding under the skin.

► **Total Papers: 2**

<
<https://drtrozzi.org>>

Petechiae (back of mouth)

Purpura Annularis Telangiectodes

An uncommon pigmented purpuric eruption, which is characterized by symmetrical, purpuric, telangiectatic, and atrophic patches with a predilection for the lower extremities and buttocks.

► **Total Papers: 2**

 English (UK)

<https://drtrozzi.org>

Pulmonary Embolism

Pulmonary embolism is a blockage in one of the pulmonary arteries in your lungs. In most cases, pulmonary embolism is caused by blood clots that travel to the lungs from deep veins in the legs or, rarely, from veins in other parts of the body (deep vein thrombosis). Because the clots block blood flow to the lungs, pulmonary embolism can be life-threatening.

► **Total Papers: 2**

<https://drtrozzi.org>

Pulmonary Embolism

Psoriasis

A chronic autoimmune condition that causes the rapid buildup of skin cells. This buildup of cells causes scaling on the skin's surface. Inflammation and redness around the scales is fairly common. Typical psoriatic scales are whitish-silver and develop in thick, red patches. Sometimes, these patches will crack and bleed.

► **Total Papers: 4**

<https://drtrozzi.org>

Nephrotic Syndrome

Kidney disorder that causes your body to pass too much protein in your urine. Nephrotic syndrome is usually caused by damage to the clusters of small blood vessels in your kidneys that filter waste and excess water from your blood.

► **Total Papers: 4**

<
<https://drtrozzi.org>>

Nephrotic syndrome urine (left and middle) Healthy urine (right)

Bullous Drug Eruption

Refers to adverse drug reactions that result in fluid-filled blisters or bullae. Blistering may be localised and mild, or widespread and severe, even life-threatening.

► **Total Papers: 2**

<
<https://drtrozzi.org>>

Bullous Drug Eruption (chin)

Hemophagocytic Lymphohistiocytosis

An aggressive and life-threatening syndrome of excessive immune activation. It most frequently affects infants from birth to 18 months of age, but the disease is also observed in children and adults of all ages.

► Total Papers: 2

<
<https://drtrozzi.org>>

Varicella Zoster Virus

The varicella-zoster virus (VZV) is so named because it causes two distinct illnesses: varicella (chickenpox), following primary infection, and herpes zoster (shingles), following reactivation of latent virus. Varicella is a highly contagious infection with an incubation period of 10–21 days, most commonly 14–16 days, after which a characteristic rash appears. Acute varicella may be complicated by secondary bacterial skin infections, haemorrhagic complications, cerebellitis, encephalitis, and viral and bacterial pneumonia.

<https://drtrozzi.org>

Alopecia Areata

Graves' Disease

An autoimmune disorder that causes hyperthyroidism, or overactive thyroid. With this disease, your immune system attacks the thyroid and causes it to make more thyroid hormone than your body needs. The thyroid is a small, butterfly-shaped gland in the front of your neck. Thyroid hormones control how your body uses energy, so they affect nearly every organ in your body—even the way your heart beats. If left untreated, hyperthyroidism can cause serious problems with the heart, bones, muscles, menstrual cycle, and fertility. During pregnancy, untreated hyperthyroidism can lead to health problems for the mother and baby. Graves' disease also can affect your eyes and skin.

Urticaria

Central Vein Occlusion

A blockage of this vein that causes the vein to leak blood and excess fluid into the retina. This fluid often collects in the area of the retina responsible for central vision called the macula. When the macula is affected, central vision may become blurry. The second eye will develop vein occlusion in 6-17% of cases. There's no cure for retinal vein occlusion. Your doctor can't unblock the retinal veins. What they can do is treat any complications and protect your vision.

Kounis Syndrome

The concurrence of acute coronary syndromes with conditions associated with mast cell activation, such as allergies or hypersensitivity and anaphylactic or anaphylactoid insults that can involve other interrelated and interacting inflammatory cells behaving as a 'ball of thread'.

► **Total Papers: 1**

Angioimmunoblastic T-cell Lymphoma

A type of peripheral T-cell lymphoma. It is a high grade (aggressive) lymphoma that affects blood cells called T cells. High grade lymphomas tend to grow more quickly than low grade lymphomas. AITL usually affects older people, typically around the age of 70, is typically aggressive with a median survival of fewer than 3 years, even with intensive treatment.

Autoimmune Inflammatory Rheumatic Diseases

Rheumatic diseases are autoimmune and inflammatory diseases that cause your immune system to attack your joints, muscles, bones and organs. Rheumatic diseases are often grouped under the term “arthritis” – which is used to describe over 100 diseases and conditions.

► Total Papers: 1

Neurological Autoimmune Diseases

If you have a neurological autoimmune disease, your immune system may be overly active and mistakenly attack healthy cells. These include central nervous system demyelinating disorders such as multiple sclerosis and neuromyelitis optica, paraneoplastic, and other autoimmune encephalomyelitis and autoimmune inflammatory myositis and demyelinating disorders.

The man-enhanced diseases were created in order to justify enormous profits that can be created with 'cures' they purvey for Big Pharma profit seem to be more dangerous than the diseases they have no impact upon!

These injected poisons that were illegitimately permitted an Emergency Use Authorisation by the FDA, because they were complicit in hiding pre-existing SAFE and proven medicines that 'must not exist' if an EUA could be awarded. Money talks, join the dots!

No LIABILITY is the most unbelievable entitlement that Big Pharma has conned the world into accepting. No LIABILITY is absolute nonsense!

Fauci made his fortune collaborating with Big Pharma in creating profitable diseases. Not 'cures' because in that venture he was abysmal! He falsified information about his 'Gain of Function' 'bio-weapon' research and experimentation, which he inherited from The US Department of Defense, and created profit-making opportunities.

The US CDC has recently patented Ebola to continue the deadly Big Pharma tradition. We can only assume this is to artificially create more business and profits for their murdering associates. It used to be regarded as illegal and immoral to Patent a living organism. We await the next Business case of Ebola or another COVID Mk 2. Money talks – join t
